

Planting a bare root tree

We supply all needed for successful planting - Ask about our 'planting kits'

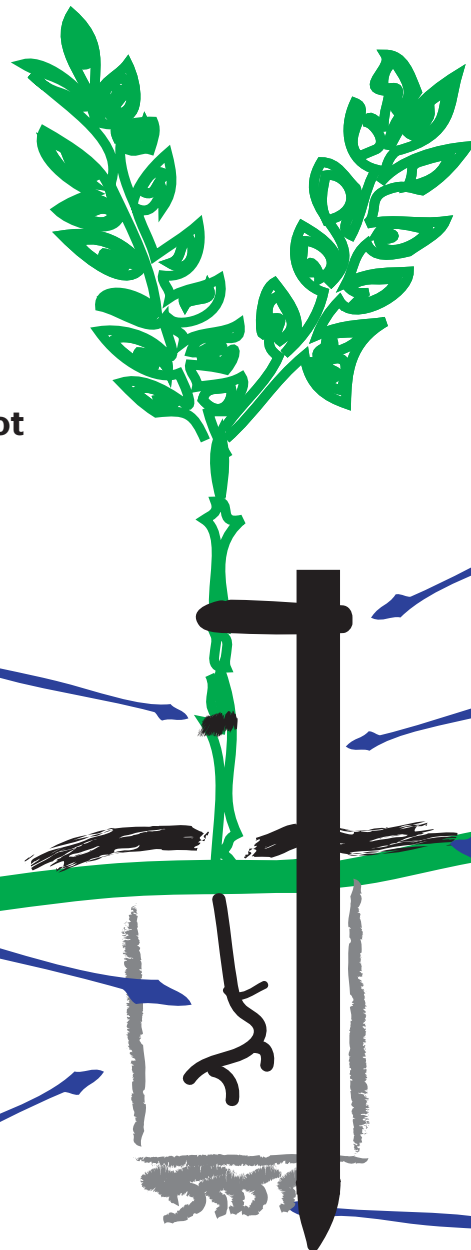

We recommend adding
Rootgrow around the root
at the time of planting

Graft union - ensure
this is well clear of
soil level

Ensure no air around
roots, heel in well

Back fill with a mixture of
soil and a good compost

Flexible tree tie

Stake with sturdy 50mm
stake at least 450mm
into ground

Mulch mat to suppress
weeds and retain
moisture

Break up soil with a fork

Remember this is your chance to get underneath the tree and improve the planting site
