1.B Adam's Pearmain - Brought to notice in 1826 and introduced and exhibited by R. Adams from Herefordshire. A popular Edwardian and Victorian dessert apple. Fruits are juicy and a little sweet, with a pleasant aromatic flavour.

Use: Dessert picking time: Early October

2.B Annie Elizabeth - Raised by Samuel Greatorex at Knighton, Leicester in about 1857 and named after his baby daughter who died in 1866. Introduced in about 1898. Received a First Class Certificate from the Royal Horticultural Society in 1868. A fine, late-keeping cooking apple.

Picking time: Early October

3.B Aldwick Beauty - A seedling which arose in the garden of Mrs D.M. Alford, Aldwick, Bognor Regis, Sussex. Received by the National Fruit Trials in 1969. Fruits are sweet but tend to be rather dry.

Use: Dessert picking time: Mid August

4.B Alfriston - Raised in the late 1700s by Mr Shepherd at Uckfield, Sussex and named Shepherd's Pippin. Re-named Alfriston in 1819. Received the Award of Merit from the Royal Horticultural Society in 1920. Fruits are soft, coarse-textured, not very juicy and acid. Cooks well.

Use: Culinary picking time: Early October

5.B Arthur Turner - Raised by Charles Turner at Slough, Bucks. A large cooking apple with somewhat tough skin. Well known for its particularly attractive blossom.

Use: Culinary Picking time: Late

September

6.DAshdown Seedling - Originated with the Ashdown and General Land Company, Horsted Keynes, Sussex. Received by the National Fruit Trials in 1966. Fruits are very similar to Discovery.

Use: Dessert Picking time: Late August

7. Beauty of Kent - Thought to be of English origin. Introduced in about 1820. Received an Award of Merit from the Royal Horticultural Society in 1901. Fruits are coarse textured, juicy and subacid, with a faint pleasant flavour.

Use: Culinary Picking time: Late September

8. <u>Bloody Ploughman</u> - Originated at Carse of Gowrie, Scotland. Recorded in 1883. Fruits have crisp, tender flesh with a slightly sweet, subacid flavour.

Use: Dessert Picking time: Mid September

9. <u>Bossom</u> - Received by the National Fruit Collection in 1991 from Rev. D. Johnson, Petworth, Sussex. Fruits have creamy yellow flesh with a sweet subacid flavour.

Use: Dessert Picking time: Late September

10. <u>Brenchley Pippin</u> - Raised in Brenchley, **Kent**. Recorded in 1884. Fruits have tender flesh with a sweet, aromatic flavour.

Use: Dessert Picking time: Mid October

11. <u>Byfleet Seedling</u> - Raised in 1915 by George Carpenter at West Hall, Byfleet, Surrey. Fruits have firm, juicy flesh with a slightly acid, aromatic flavour. Cooks very well.

Use: Culinary Picking time: Early October

12. <u>Catshead</u> - Originated in England and known in the 1600s. A distinctly angular and somewhat ugly apple. Fruits are coarse-textured and rather dry with a subacid flavour.

County of Origin - Kent

Use: Culinary Picking time: Early October

13. <u>Chad's Favourite</u> - Raised by M.B. Crane at the John Innes Horticultural Institute, Merton, London. Received by the National Fruit Trials in 1939 and named in 1952. Fruits have coarse, soft flesh with a sweet subacid, aromatic flavour.

Use: Dessert Picking time: Early October

14. <u>Chorister Boy</u> - Found in a garden in Wiltshire. First recorded in 1890. Introduced by Keynes, Williams & Co., Salisbury. Fruits are soft, juicy and slightly acid with very little flavour.

County of Origin - Wiltshire

Use: Dessert Picking time: Early October

15. Claygate Pearmain - Discovered by John Braddick at Claygate, Surrey and exhibited to the Horticultural Society in 1821. It received an Award of Merit in 1901 and a First Class Certificate in 1921 from the Royal Horticultural Society. Fruits have firm, rather coarse textured juicy flesh with a rich aromatic flavour.

Use: Dessert Picking time: Early October

16. <u>Cockle Pippin</u> - Originated in Kent. It was known in the late 1600s. Fruits have firm, white, sometimes stained red flesh with a sweet to subacid flavour.

Use: Dessert Picking time: Mid October

17. Court of Wick

Originated at Court of Wick, Yatton, **Somerset** and introduced in 1790 by Wood of Huntingdon. Fruits are crisp with a rich and subacid flavour.

Use: Dessert Picking time: Late September

18. <u>Court Pendu Plat</u> This variety originated in Europe. It was first described in about 1613 but believed to be much older than this. It was also called 'Wise Apple' because it flowers late and escapes spring frost damage. Fruits have very firm, fine-textured, juicy flesh, which is sweet with a pleasant, slightly aromatic flavour.

Use: Dessert Picking time: Mid October

19. Crawley Beauty
Sussex in about 1870 and introduced in 1906 by nurserymen J. Cheal & Sons of Crawley. It appears to be identical with French variety Novelle France. Received an Award of Merit from the Royal Horticultural Society in 1912. Fruits have slightly coarse-textured, rather dry flesh with a subacid, slightly sweet flavour.

Use: Dual Purpose Picking time: Mid October

20. <u>Crawley Reinette</u> Introduced by J. Cheal & Sons, Crawley, Sussex. Recorded in 1902. Fruits have soft flesh with an acid to subacid flavour.

Use: Dessert Picking time: Mid October

21. Curl Tail Originated from Surrey, England. First recorded in 1872. Fruits have soft, coarse-textured, dry flesh with a subacid flavour.

Use:Culinary Picking time:Mid September

22. <u>Doctor Hogg</u> Raised by Sidney Ford, gardener at Leonardslee, Horsham, Sussex. Introduced in about 1880 by W. Paul & Son. It received a First Class Certificate from the Royal Horticultural Society in 1878. Fruits have tender flesh with a sweet and subacid flavour. Cooks well.

Use: Culinary Picking time: Early September

23. <u>Downton Pippin</u> Raised by Thomas Andrew Knight at Wormsley Grange, Hereford. It was first exhibited in 1806. Fruits have firm, crisp flesh with a sweet, subacid, vinous flavour.

Use:Dessert Picking time: Mid September

24. <u>Duchess's Favourite</u> Raised in about 1800 by Mr Cree, a nurseryman of Addlestone, **Surrey**. Fruits have crisp, yellow flesh with a brisk and pleasant flavour.

Use:Dessert Picking time:Early September

25. <u>Dumelow's Seedling</u> Raised by Mr Dumelow (or Dumeller) at Shakerstone, Leicestershire. The original tree was growing in 1800. It was exhibited as Dumelow's Crab in 1818, and renamed Wellington in 1819 or 1820. Fruits have very firm, crisp, juicy flesh which is extremely acid. Cooks well.

Use: Culinary Picking time: Early October

26. Flower of the Town Originated in Yorkshire, England. It was first described in 1831. Fruits have firm flesh with a subacid flavour.

Use:

Dessert

Picking time:

Early September

27. Forge Said to have originated at a Forge Farm in Sussex or near one of the old forges in the iron district near East Grinstead, **Sussex**. It was described in 1851 when it was already well known. Fruits have crisp, very juicy flesh with a pleasant aromatic flavour.

Use: Dessert Picking time: Late September

28. <u>Fortune</u> Raised in 1904 by Laxton Brothers Ltd. at **Bedford**, England and introduced in 1931. It received a First Class Certificate from the Royal Horticultural Society in 1948. Fruits have fairly firm, rather coarse-textured, juicy flesh with a sweet and good aromatic flavour.

Use: Dessert Picking time: Early September

29. <u>Gascoyne's Scarlet</u> Raised by Mr Gascoyne at Bapchild Court, Sittingbourne, Kent. It was introduced in 1871 by nurseryman G. Bunyard & Co., Maidstone, Kent. Received a First Class Certificate from the Royal Horticultural Society in 1887. Fruits have firm, fine-textured, slightly juicy, sweet flesh with very little flavour.

Use: Dual Purpose Picking time: Late September

30. George Carpenter Raised in 1902 by George Carpenter at West Hall Gardens, Byfleet, **Surrey**. Fruits have firm, fine-textured, juicy, sweet flesh with a good aromatic flavour somewhat like Blenheim Orange.

Use: Dessert Picking time: Mid September

31. <u>George Cave</u> Raised in 1923 by George Cave at Dovercourt, Essex. It was acquired by Seabrook & Sons Ltd., Boreham, Essex and named in 1945. Fruits have a little soft, fine-textured, juicy flesh with a little acid, slightly aromatic and pleasant flavour.

Use: Dessert Picking time: Early August

32. <u>Golden Noble</u> Discovered by Patrick Flanagan, head gardener to Sir Thomas Harr, Stowe Hall, Downham, Norfolk. It was mentioned by William Forsyth in 1803. It was introduced by Patrick Flanagan to the Horticultural Society of London in 1820. Fruits are a little soft, fairly fine-textured, very juicy, and acid. Cooks extremely well, breaking up completely.

Use: Culinary Picking time: Early October

33. <u>Great Expectations</u> Originated from **Ireland**. It was described in 1951. Fruits become very greasy. Flesh is firm and crisp and has a sweet flavour.

Use: Dessert Picking time: Mid September

34. <u>High View Pippin</u> Raised in 1911 by Frederick Fitzwater at Ernest Hill, Weybridge, **Surrey**. It received an Award of Merit from the RHS in 1928. Fruits have firm, fine-textured juicy flesh with a sweet, pleasant, aromatic flavour.

Use: Dessert Picking time: Mid October

AGGH VIEW PIPEDS

35. <u>Isaac Newton's Tree</u> Originated from a tree growing in Isaac Newton's garden at Woolsthorpe Manor, near Grantham, <u>Lincs</u> in 1660. It appears identical to Flower of Kent. Fruits have soft, coarse-textured flesh with a subacid flavour. A very shy cropper.

Use: Culinary Picking time: Mid October

36. James Grieve

Raised by James Grieve in Edinburgh, **Scotland** and introduced by his employers, Dickson's nurserymen. It was first recorded in 1893. Received Award of Merit in 1897 and First Class

Certificate in 1906 from RHS. Fruits have rather soft but very juicy flesh with a good refreshing flavour.

Use: Dual Purpose Picking time: Early September

37. Joybells Raised by Will Tayler at Godalming, Surrey. Records show that trees were grafted in about 1914. It received an Award of Merit from the RHS in 1922. Fruits are crisp and juicy with a sweet and pleasant flavour.

Use: Dessert Picking time: Late September

38. <u>Jupiter</u> Triploid. Raised in 1966 at East Malling Research Station, Kent. It was introduced in 1981. Fruits are sweet and juicy with a good texture and Cox-like flavour.

Use: Dessert Picking time: Early October

39. <u>Katy</u> Raised in 1947 at Balsgard Fruit Breeding Institute, **Sweden**. It was introduced in 1966. Fruits are crisp and juicy with a pleasant flavour.

Use: Dessert Picking time: Early September

40. <u>Kent</u> Raised in 1949 by H.M. Tydeman at East Malling Research Station, Maidstone, Kent. Fruits have slightly coarse-textured and fairly juicy flesh with a pleasant aromatic flavour.

Use: Dessert Picking time: Mid October

41. Kentish Fillbasket Thought to have originated in Kent, England. It was known before 1820. Fruits have tender, greenish-white, acid flesh.

Use: Culinary Picking time: Mid October

42. Knobby Russet Brought to notice in 1820 by Haslar Capron of Midhurst, Sussex, England. Fruits have firm, rather dry flesh with a fairly strong flavour.

Use: Dessert Picking time: Mid October

43. Lady Isabel Found in 1939 by Mrs Reading at Guildford, Surrey. Fruits have firm, crisp flesh with a subacid flavour.

Use: Dual Purpose Picking time: Early October

44. Lady Sudeley Raised in about 1849 by a cottager called Jacob at Petworth, Sussex. Introduced in 1885 by G. Bunyard & Co., Maidstone, Kent. It received an Award of Merit from the RHS in 1884. Fruits have firm, juicy flesh which is a little acid and with good flavour. Use: Dessert Picking time: Early September

45. Maidstone

Favourite Raised by G.

Bunyard & Co., Maidstone, Kent. It received an Award of Merit in 1913 from the Royal Horticultural Society. Fruits have firm, fine-textured, juicy, sweet flesh with a pleasant distinctive flavour.

Use: Dessert Picking time: Mid August

46. Sweet Merlin Received by the National Fruit Trials in 1954 from Cornwall. Fruits have firm, tender, yellowish white flesh with a slightly sweet, slightly subacid flavour.

Use: Dessert Picking time: Mid September

47. Tydeman's Michaelmas Red Raised in 1929 by H.M. Tydeman at East Malling Research Station, Kent. Fruits have greenish white, rather soft, very juicy flesh with a sweet refreshing vinous flavour.

Use: Dessert Picking time: Early September

48. Miller's Seedling Raised in 1848 by Mr James Miller at Newbury, Berkshire, England. It received the Award of Merit from the Royal Horticultural Society in 1906. Fruits have white, rather soft, very juicy flesh with a sweet and refreshing flavour. Bruises easily.

Use: Dessert Picking time: Late August

49. <u>Newton Wonder</u> Raised by Taylor at King's Newton, Melbourne, Derbyshire, England. Introduced in about 1887 when it also received a First Class Certificate from the Royal Horticultural Society. Fruits have rather coarse-textured, moderately juicy flesh with a subacid flavour. Cooks very well.

Use: Culinary Picking time: Mid October

50. <u>Pitmaston Pine Apple</u> Raised by Mr White, steward to Lord Foley at Witley, England in about 1785. Introduced by Williams of Pitmaston, Worcester, England. Fruits have firm, juicy flesh with a sweet, rich, distinctive flavour.

Use: Dessert Picking time: Early October

51. Queen Raised by W. Bull, a farmer at Billericay, Essex, England from seed sown in 1858. Introduced in 1880 by Saltmarsh of Chelmsford, Essex as 'The Claimant'. Received a First Class Certificate from the Royal Horticultural Society in 1880. Fruits have white, rather soft, fine-textured, juicy flesh with a distinctly acid flavour.

Use: Culinary Picking time: Mid September

52. <u>Miller's Seedling</u> Raised in 1848 by Mr James Miller at Newbury, **Berkshire**, England. It received the Award of Merit from the Royal Horticultural Society in 1906. Fruits have white, rather soft, very juicy flesh with a sweet and refreshing flavour. Bruises easily.

Use:Dessert Picking time:Late August

53. Norfolk Royal (red) A seedling found at Wright's Nurseries, North Walsham, Norfolk. Introduced in 1928 and named in 1930. Medium to large. Conical to long conical (the photo does not give a good impression of the shape) Can be slightly lopsided, regular, slightly flat sided. Five crowned.

Base green but as it ripens almost completely covered with scarlet red flush, sometimes a little russet. Lenticels inconspicuous, skin very smooth and shiny.

54. Rosemary Russet

Raised in England. First described in 1831. Fruits have firm, fine-textured, juicy flesh with a rather acid and good flavour.

Use: Dessert Picking time: Early

October

55. Saltcote Pippin Raised by James Hoad at Rye, Sussex. First recorded in 1918. Received an Award of Merit from the Royal Horticultural Society in 1928. Fruits have firm, slightly juicy flesh with a sweet and good aromatic flavour.

Use: Dessert Picking time: Early October

56. Scarlet Nonpareil Raised in about 1773 in the garden of an inn at Esher, Surrey. Received the Award of Merit from the Royal Horticultural Society in 1901. Fruits have fine, creamy white flesh with a subacid and rich flavour.

Use: Dessert Picking time: Mid October

57. <u>Sussex Mother</u> Originated in Sussex, England. Described in 1884. Fruits have soft, tender, greenish white flesh with a subacid and slightly sweet flavour.

Use: Dessert Picking time: Early September

58. Tower of Glamis (Scott) Originated in Scotland.

Known before 1800. Fruits have crisp, fairly fine, firm, greenish white flesh with an acid and perfumed flavour.

Use: Culinary Picking time: Early October

59. <u>Tydeman's Early Worcester</u> Raised in 1929 by H.M. Tydeman at East Malling Research Station, Kent. Introduced in 1945. Fruits have white, crisp, fine-textured,

juicy flesh with a good vinous flavour.

Use: Dessert Picking time: Late August

60. <u>Tydeman's Late Cox</u> Raised in 1930 by H.M. Tydeman at East Malling Research Station, Kent. Introduced in 1949. Fruits have very firm, crisp, fairly juicy, cream flesh with a rich, aromatic flavour.

Use: Dessert Picking time: Mid October

61. Wadhurst Pippin Originated in the early 1800s at Wadhurst, Sussex. Fruits have crisp, yellowish flesh with a subacid flavour.

Use: Dessert Picking time: Early October
